

Bringing
metal spinning
technology
full circle.

High Quality CNC Spin Forming Equipment

THE WINNING COMBINATION OF REFINED, LEADING-EDGE EQUIPMENT

Your Profitability + Our Performance

Real efficiency. Real quality. Real profitability. Proven in hundreds of installations worldwide. From CNC metal spinning equipment and specialty machinery, to retrofits and close-support field service, we are committed to providing you with superior value and results.

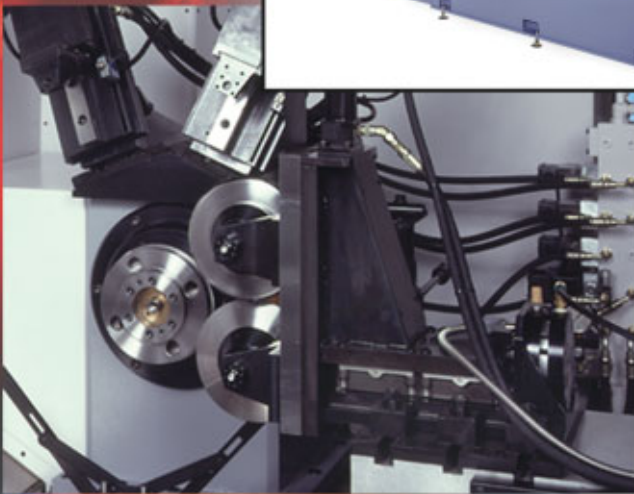

MJC Engineering and Technology constantly strives to raise the manufacturing bar. The result is a true revolution in manufacturing technology. At the core of this unmatched resource is a comprehensive line of innovative, flexible metal spin forming machines that address:

- Circle blanks and preforms for all formable metals;
- Steel and aluminum high-pressure cylinder manufacturing;
- Metal spinning cell integration.

And our capabilities do not end with our standard product line. We offer complete customized equipment and machinery, fully designed and engineered to meet your specific needs.

The MJC advantage ... Start with an understanding of your needs and opportunities. Apply the

most innovative engineering and design talent to find the perfect solution. Build to the most exacting standards. Complete the installation quickly and efficiently. And, provide comprehensive support that keeps you running at peak efficiency year after year.

World-class companies rely on MJC as the supplier-of-choice for their most challenging metal spinning equipment needs:

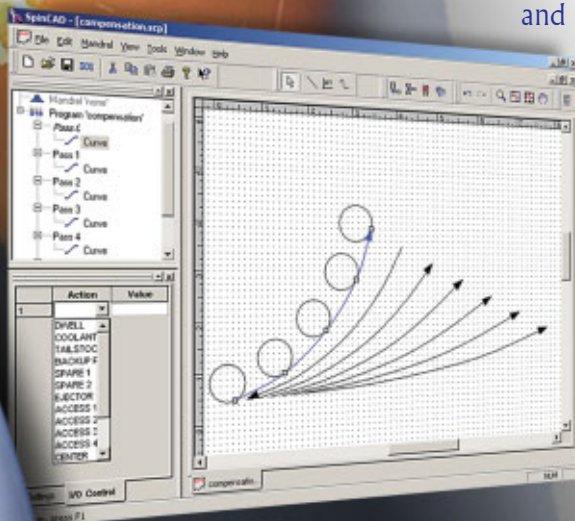

- ⊙ Hamilton-Sundstrand
- ⊙ Allied Signal
- ⊙ Hubbell Lighting
- ⊙ Lawrence Livermore Labs
- ⊙ FIBA Technologies, Inc.

and many, many more...

A New Spin on Productivity

MJC's skilled engineers spent years developing 'SpinCAD', our exclusive CNC Programming Software. This easy to learn and use technology makes your spinning equipment more productive than ever before by incorporating full editing capability, fully configurable machine I/Os with infinite spin profiles, desktop programming and networking capacity.

Our Performance

Advanced CNC Control Systems

MJC's top-of-the-line spinning machines offer complete programmability in playback, online or offline, CNC or in combination. Optional Internet and remote diagnostics are available for every system user.

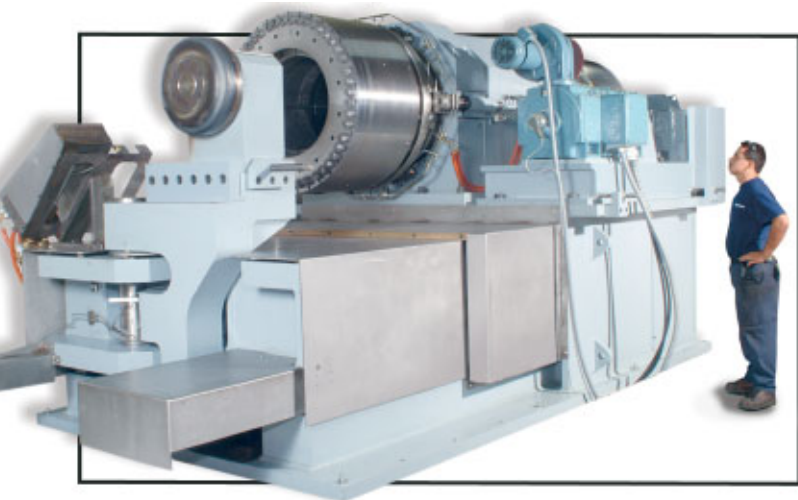

“When we decided to invest in an upgrade to our equipment, we learned quickly that MJC offered the best solutions and support – period. They have taken us to a new level.”

What Our Customers Say

“MJC knows how to keep us up and running. Service is fast and efficient. This equipment is critical to our production. We have never been disappointed by MJC.”

“Our specialized needs required a great deal of custom engineering and a knowledge of our requirements. MJC delivered on each and every promise. That is rare today.”

Cost-Effective Solutions

MJC manufactures high-tech metal spinning equipment, and specializes in CNC retrofit, machine rebuilding and support for leading manufacturers worldwide. Guided by our 'take care of our customers' philosophy, we've earned a reputation for delivering smart, cost-effective solutions.

Quality at Every Turn

Our staff of design engineers identifies and resolves special machinery needs. Through ongoing research and development, our commitment is to optimize equipment and processes, to raise the standard of quality for spun parts, and to push the envelope in field service.

Retrofits and Field Service

Drawing from our deep service and support experience with older model spinning lathes, MJC performs CNC retrofits on most automatic and semi-automatic spinning machines, and provides comprehensive CNC/PLC/Playback troubleshooting and repair.

Bringing metal spinning technology full circle

Examine our broad line of products and enhanced services:

- Standard CNC spinning machines from 12" to 72" diameters
- 2, 3 and 4 axis for circle blanks, tubes and preforms
- Custom spinning machines built to your specific application
- Complete CNC control system retrofits
- Experienced and knowledgeable Field Service Technicians for most brands of CNC and PLC systems
- 12-Month Warranty and full factory support for all MJC products
- Metal Spinning Consulting Services
